TRIPLE CAMBER TECHNOLOGY

MORE THAN A PROFILE

It's hard to get people to try new things. Easier to just follow trends. We do new because we never stop striving to improve and we believe in innovation! Triple Camber has brought an entirely new perspective to snowboard performance. Literally for everyone, no matter your style. The profile is the edge tech, and the edge tech is the profile. They work harmoniously together to grip, glide, turn quicker and easier, pop higher, and float better. More high-pressure contact areas equals improved stability, better edge hold, and straight tracking.

The three camber areas lock-in on rails and provide explosive energy. In 2024/25 we build on our Triple Camber innovation of combining Triple Camber with traditional camber creating Recurve Triple Camber with the launch of the Recurve All Mountain Twin Proto Ultra.
